INTERVENTIONS IN CONGENITAL HEART DISEASE

Prof. Khalid A. Sorour, MD
Cardiology Dept. Cairo University

The different interventions for congenital heart disease will be reviewed in this talk. The ACC/AHA guidelines for these interventions will be mentioned, stressing those that are regularly done from those that are still under trial.

Examples of some of these interventions done in our catheter laboratory will be shown, mostly in the adolescent and adult population, leaving the infants and younger children to the pediatric department.

The types of anaesthesia used for our patients are mentioned
